Professional Summary

Highly motivated Java Backend Developer with hands-on experience building scalable backend applications using Java, Spring Boot, RESTful APIs, SQL databases, Docker, AWS, and Git. Passionate about clean architecture, software engineering best practices, and delivering reliable backend systems in Agile environments.

Technical Skills

Languages: Java, SQL, Python, JavaScript

Frameworks: Spring Boot, Spring MVC, Spring Security, Hibernate, JPA

Databases: MySQL, PostgreSQL, MongoDB

Cloud & DevOps: AWS, Docker, GitHub Actions, CI/CD

Tools: Git, GitHub, Maven, Postman, IntelliJ IDEA, VS Code

Concepts: REST APIs, JWT Authentication, Microservices, OOP, Design Patterns, SOLID, Unit Testing

Professional Experience

Backend Software Developer — Tech Solutions (2024–Present)

- Developed scalable REST APIs with Spring Boot.
- Implemented JWT authentication and Spring Security.
- Designed and optimized MySQL/PostgreSQL databases.
- Reduced API response time by 40%.
- Deployed services using Docker and AWS.
- Participated in Agile Scrum, code reviews, and CI/CD pipelines.

Projects

AI Recruitment Platform

Built an AI-powered recruitment platform with CV analysis, candidate ranking, OpenAI

integration, PostgreSQL, Spring Boot, and React.

E-Commerce Backend

Developed secure REST APIs, order management, authentication, and payment integration using Spring Boot and MySQL.

Education

B.Sc. in Software Engineering (2022–2026)

GPA: 3.92 / 4.00

Certifications

- AWS Certified Cloud Practitioner
- Oracle Java Foundations
- Spring Boot REST API Development
- Docker Essentials

Languages

Arabic (Native)

English (Fluent)

Hebrew (Professional)
